

## ICC Modbus Master Tool Version Info

### ▶ 09.30.2019

#### Software

- V2.0.3.0 Release
- Added support for all register types (Coils, Discrete Inputs, Holding Registers, and Input Registers) by allowing a read function code (RFC) and write function code (WFC) to be defined in the XML profile.
- Added a "Register Types" section to the parsing summary.
- Added a "Type" column to the log.
- Added an additional sample XML file, "ICC Profile Extended Example".
- Improved alignment for reporting register settings.
- Improved error handling.
- Added a digital signature to the installer files.

#### User's manual version

- September 30, 2019

### ▶ 02.05.2016

- Fixed communication issue with some USB serial converters.

#### User's manual version

- September 15, 2012

### ▶ 09.19.2013

#### Software

- V1.3.3.2 Release

- Changed sharing permissions on the log file so that a 3<sup>rd</sup> party application may read the log file while the logger is simultaneously writing to it.

User's manual version

- September 15, 2012

▶ **09.06.2012**

Software

- V1.3.3.1 Release
- Fixed issue where print dialog would not appear for 64-bit systems when Print Results button was clicked in the results window.
- Changed logging so that each log entry is written at the configured interval rather than delaying for that interval after each log entry has been written.
- Changed warning message in XML file verification if no icon is specified.
