

EIP4CCPU Version Info

▶ 11.30.2016

Core

- V1.126 release.
- Send a request to disable the TCP Encapsulation Inactivity Timeout in an attempt to prevent the target device from closing the underlying TCP socket connection.
- Send a NOP command to prevent the target device from closing the underlying TCP socket connection.
- If the underlying TCP socket connection is closed, this will no longer shutdown/restart the class1 I/O CIP connections.

User's Manual

- 10816 September 2, 2014

▶ 07.12.2016

Core

- V1.123 release.
- Fixed detection of the first received I/O packet to guarantee that the data is consumed.

User's Manual

- 10816 September 2, 2014

▶ 01.04.2016

EIP4CCPU Scanner Configuration Utility

- V1.2.3.6 release.
- Fixed issue where EDS file registration fails for EDS files that contain connections which use only secondary configuration bytes.

User's Manual

- 10816 September 2, 2014

▶ 07.20.2015

EIP4CCPU Scanner Configuration Utility

- V1.2.3.5 release.
- Improve Ethernet discovery and connection.

User's Manual

- 10816 September 2, 2014

▶ **06.11.2015**

Core

- V1.122 release.
- Improved compatibility with devices that specify use of a non-standard EtherNet/IP port.

User's Manual

- 10816 September 2, 2014

▶ **11.06.2014**

EIP4CCPU Scanner Configuration Utility

- V1.2.3.4 release.
- Changed FTP connections to ignore proxy server settings configured in Internet Explorer.
- Fixed issues where an unhandled exception may occur when adding modules to an adapter.

User's Manual

- 10816 September 2, 2014

▶ **09.02.2014**

Core

- V1.121 release.
- Fixed bug that falsely generated a 1C error code for input size of 0.

EIP4CCPU Scanner Configuration Utility

- V1.2.3.3 release.
- Fixed EDS file parsing for 16 and 32-bit values in connection path.
- Added ability to select the major versions for unregistered devices.
- Fixed issue in writing and parsing configuration file when the connection input size is 0.
- Added default Min and Max Value to Parameters if none is specified in the EDS file.
- Added support to display configuration parameters that are read-only.

User's Manual

- 10816 September 2, 2014

▶ **10.11.2012**

Core

- V1.120 release.
- Accept any valid IP multicast address in the T→O direction.

- Ignore extra optional data in Set Attribute Single response.
- Fixed error code for invalid CCPU slot.

EIP4CCPU Scanner Configuration Utility

- V1.2.3.0 release.
- Adapters are now allowed to be in any legal slot, instead of only slot 0.
- Improved EDS parsing for adapters and modules.
- Added Generic Module and Generic Adapter devices.
- Minor bug fixes.

User's Manual

- 10816 October 11, 2012

▶ **05.04.2012**

EIP4CCPU Scanner Configuration Utility

- V1.1.3.9 release.
- Made CPU Number selectable in the CPU Settings between Auto, 2, 3, and 4.
- Changed Input and Output Address to be the actual shared memory address and added Input and Output Offset to the Connection Properties.
- Added support to create GX Works2 labels for I/O data.

User's Manual

- 10816 May 1, 2012

▶ **10.04.2011**

Core

- V1.110 release.
- EtherNet/IP conformance tested by ODVA.
- Increased connection count: 128 TCP, 128 class 1 CIP, 64 CIP multicast.
- Added support for Point-to-Point (Unicast) T→O CIP connections.
- Implemented the Unconnected Send service to provide routing for unconnected explicit messages.
- Added ability to get and set error code via sequencing PLC.

EIP4CCPU Scanner Configuration Utility

- V1.1.3.0 release.
- Increased connections: 128 TCP, 128 class 1 CIP, 64 CIP multicast.
- Added support for Point-to-Point (Unicast) T→O CIP connections.
- Added ability to get and set error code via sequencing PLC.
- Added scanner diagnostics.
- Added connection diagnostics.

- Added support for multiple module revisions.
- Added Help documentation.
- Added Generic Device.
- Registering and Unregistering of EDS files automatically update the references in the device list.
- Added slot column to Connection Details panel.
- Added EDS file info in the Device Properties.
- Added button to save the scanner's log file.
- Added feature to search for devices in the Hardware Selection Tree.

User's Manual

- 10816 October 4, 2011

▶ **04.01.2011**

Core

- V1.100 initial release.

User's manual version

- 10816 February 1, 2011
